

How to find Restaurant Chefs with Boolean search strings

If you're looking for a [Chef](#), Boolean logic can help you discover resumes. Modify our examples of [Boolean search commands](#) to source Restaurant Chefs by skills, experience and location.

Generic search string to find a Chef

Your search strings will be more effective if they:

- **Reduce false positives.** Use terms like *-job -jobs -sample -examples* to exclude irrelevant results.
- **Expand your search.** Use variations of the same job title like *(chef OR cook)*
- **Target resumes.** Use the command *(intitle:resume OR intitle:cv)* to generate results that contain the words "resume" or "CV" in the page title. You could do the same for urls with the command *(inurl:resume OR inurl:cv.)*

When sourcing EU candidates, please refer to guidance on [collecting candidate information](#) as per the General Data Protection Regulation, or GDPR.

Here's an example of a generic search string to [find resumes](#):

```
(intitle:resume OR intitle:cv) (inurl:resume OR inurl:cv) "restaurant chef" -job -jobs -template -sample
```

Examples of Boolean search strings to find Chefs by title and experience

Find Chefs who:

Use different job titles depending on their experience:

```
(intitle:resume OR intitle:cv) ("executive chef" OR "head chef") -job -jobs -sample -examples
```

```
(intitle:resume OR intitle:cv) "line cook" -job -jobs -sample -examples -example
```

```
(intitle:resume OR intitle:cv) "sous chef" -job -jobs -sample -examples
```

(intitle:resume OR intitle:url) (inurl:resume OR inurl:cv) "senior chef de partie" -job -jobs -template -sample

Specialize in certain cuisines

(intitle:resume OR intitle:cv) "pastry chef" -job -jobs -sample -examples -example

(intitle:resume OR intitle:cv) chef "italian cuisine" -job -jobs -sample -examples -example

(intitle:resume OR intitle:cv) chef (thai OR japanese) -job -jobs -sample -examples -example
