## How to find Technical Writers with Boolean search strings

Use Boolean logic in Google to find resumes and profiles of [Technical Writers](#). Modify our search string examples to recruit professionals who can communicate technical information in accessible ways.

### Generic Boolean search string for Technical Writer

- Build search according to your needs:
- -job -jobs -sample -examples, to avoid irrelevant results
- (intitle:resume OR intitle:cv), to discover candidates' online resumes or CVs

Here's an example of a Boolean search string for technical writers that you can further modify to find resumes:

*(intitle:resume OR intitle:cv) "technical writer" -job -jobs -sample -examples*

When running this command in Google, you'll get results that include the words "resume" or "CV" in the page title. Excluding more terms reduces false positives.

### Searching for profiles of Technical Writers

Search for Technical Writers on specific sites through Google by including the site: operator and terms found exclusively on member profiles. For example:

- *site:quora.com "credentials & highlights" "technical writer"*
- *site:meetup.com "member since" "technical writer"*

Add more criteria in your Boolean strings for technical writers to find profiles that better match your requirements.

**When sourcing EU candidates, please refer to guidance on [using social media for recruiting and collecting candidate information](#) as per the [General Data Protection Regulation, or GDPR](#).**

### Examples of Boolean search strings to find Technical Writers by

---
