
How to find App Designers with Boolean search strings

If you're looking to hire App Designers, use Boolean logic on Google to find resumes and profiles. Modify our search strings examples to target your sourcing and find skilled App Designers who can create attractive applications.

Generic search string to find App Designers

Build Boolean strings for app designers according to your needs:

- -job -jobs -sample -examples, to avoid irrelevant results
- (intitle:resume OR intitle:cv), to discover candidates' online resumes or CVs
- ("app designer" OR "application designer"), to cover variations of the same role

Here's an example of a generic Boolean search string for app designers that you can further modify to find resumes:

(intitle:resume OR intitle:cv) ("app designer" OR "application designer") -job -jobs -sample -examples

By using this string on Google, you will get results that contain the words "resume" or "CV" in the page title. Adding variations of job titles will provide more relevant results. And, excluding more terms reduces false positives.

Searching for App Designer profiles

Find App Designers by looking through websites, like [Stack Overflow](#), on Google. Include the site: operator and terms found exclusively on member profiles. For example:

- *site:github.com "app designer" "joined on"*
- *site:dribbble.com "app designer" "shots"*
- *site:stackoverflow.com/users/ "badges" "app designer"*

Add more criteria in your search to find profiles that better match your requirements.

When sourcing EU candidates, please refer to guidance on [using social media for recruiting](#) and [collecting candidate information](#) as per the General Data Protection Regulation, or GDPR.

Examples of Boolean search strings to find App Designers by skills and experience
