
How to find Front-End Web Developers with Boolean search strings

Boolean search helps you enhance your pipeline with great candidates so you can hire qualified [Front-End Web Developers](#). Our example Boolean strings are crafted to include front-end technologies developers use to create websites and web applications. Run our strings on Google and refine them based on your requirements.

Generic search string to find Front-End Web Developers

Use the *intitle:* and *inurl:* operators to find the word “resume” in page titles and page urls. Here’s a basic search string that you can further modify based on your needs:

(intitle:resume OR inurl:resume) “front end web developer” -job -jobs -sample -examples -indeed -hire -bistro -jobvertise

To expand your search, include other words that are often found in resumes, like “CV,” “bio,” “employment history” and “work experience.” We use the *NOT (-) operator* to avoid getting false positives (e.g. examples of resumes.)

Searching for Front-End Developer profiles

Use Boolean strings to look through websites where Front-End Web Developers are active and showcase their skills and interests. Include the *site:* operator and terms found exclusively on member profiles. For example:

- *site:meetup.com “front end web developer” “member since”*
- *site:github.com “front end web developer” “contribution activity”*
- *site:stackoverflow.com/users/ “badges” “front end web developer”*

Add more criteria in your search (e.g. city) to find profiles that better match your requirements.

When sourcing EU candidates, please refer to guidance on [using social media for recruiting and collecting candidate information](#) as per the [General Data Protection Regulation, or GDPR](#).

Examples of Boolean search strings to find Front-End Web Developers by experience and knowledge of technologies

Most Front-End Web Developer resumes list coding languages (e.g. JavaScript,) markup languages (e.g. HTML) and stylesheet languages (e.g. CSS.) Our example strings are built around less common skills.
