
How to find Sales Coordinators with Boolean search strings

To hire [Sales Coordinators](#), use Boolean search to enrich your hiring pipeline with new resumes. Our sample Boolean strings provide a basis to create your own searches based on location and skills that are relevant to your open roles.

When sourcing EU candidates, please refer to guidance on [collecting candidate information](#) as per the General Data Protection Regulation, or GDPR.

Generic search string to find Sales Coordinators

To target resumes, use the *intitle:* and *inurl:* operators to look for the word “resume” (or related ones like “CV” and “work history”) in page titles and page urls.

When your search strings generate pages that are irrelevant to your search, like templates and job ads, use the *NOT (-)* operator to hide those pages. Here’s an example of a basic string you can further modify:

(intitle:resume OR inurl:resume) "sales coordinator" -job -jobs -templates -examples -sample
