
How to find Pediatricians with Boolean search strings

When recruiting [Pediatricians](#), use Boolean search on Google to find profiles and resumes of qualified candidates. Customize our search strings examples to match the experience and background you're looking for in your new hires.

Recruiting Pediatricians with generic Boolean strings

Build search strings that generate the results you aim for:

- Exclude irrelevant results by using the NOT (-) operator: *-job -jobs -sample -examples*.
- Use the *intitle:* or *inurl:* operators, to get results that include the word "resume" in the page title or page url respectively.

Here's an example of a generic search string that you can further modify to find resumes:

(intitle:resume OR inurl:resume OR intitle:cv) pediatrician -job -jobs -sample -examples

Use *OR* operators to expand your results with a single search. For example, use *(pediatrician OR "pediatrics professor")*, to look for pediatricians with practices or pediatricians who teach (or those who do both.)

Searching for Pediatrician profiles

Run Boolean strings on Google to find Pediatricians on social platforms and forums. Use the *site:* operator and terms found exclusively on member profiles. For example:

- *site:doximity.com "is on Dexterity" pediatrician*
- *site:meetup.com "member since" pediatrician*

Add more criteria in your search to find profiles that better match your requirements.

When sourcing EU candidates, please refer to guidance on [using social media for recruiting and collecting candidate information](#) as per the [General Data Protection Regulation, or GDPR](#).
